Use your fabric scraps and make this easy sewing weights to help you when cutting your patterns!

LIST OF SUPPLIES

- » Fabric Scraps: 2 scraps with 10 cm x 10 cm / 4 inch x 4 inch for each weight;
- » Piece of ribbon with 10 cm / 4 inch;
- » Also needed the basic sewing supplies: scissor, pins, matching thread, iron.

Things to always have in mind:

- Always remove pins when sewing to avoid hitting the pins with the needle while sewing;
- Don't forget to backstitch in the start and finish of all the seams you are going to make;
- Pattern included seam allowance of 0,6 cm / ¼ inch, use the seam allowance unless stated otherwise.
- This pattern was designed in cm, all the measures in inch are calculated as the equivalent.

SEWING INSTRUCTIONS

1. Iron your fabrics. Cut the fabric according to the pattern / measures provided. Align all the materials to make sure you have everything you need.

2. Pin the squares right side together (leave one corner unpinned):

3. Place the ribbon like the image shows on one of the corners:

4. Pin all around, including the ribbon in place - in the middle of the squares. Sew on 3 sides of the square:

5. Sew:

6. Trim the corners:

7. Turn to the right side using a sharp object to turn the corners (I use a thin crochet needle):

8. Then make a little hem to the inside with approximately 0,6 cm / ¼ inch (same as the seam allowance). Iron it well:

8. Fill the bag with rice and if you want you add some lavender to sew with a lavender scent 😊

9. Pin the unsewed edge but making a pyramid shape and then hand stitch it with invisible stitch. *You can machine sew it also – close to the edge – but it won't make the same finishing*

You are done!
